WEB DEVELOPMENT MAIN PROJECTS ■ ■ ■

NGO human resources manager web app
Full stack web app for gTt-VIH spanish NGO developed in one week.
- Built on PERN stack with role-based auth, route protection, user session persistence, employees CRUD operations, workday check-in/check-out among many other features

Videogames e-commerce
Front, back and data base design online store styled with Tailwind CSS
- MERN stack. RESTful API connected to a MongoDB with React and Redux on the front for user interactivity and cart state management

Movie web app
Server-side rendered web application for movie search and management with two differents data bases (SQL and noSQL)

I am fueled by logic games, challenging problem-solving, and continuous learning. Looking forward to embark on a tech career, where coding sparks creativity and demands innovation.
